

12 Cancelling SSL Order

This is a series of articles dedicated to demonstrating how to get acquainted with [Openprovider SSL API methods](#). If you want to go the beginning of this guide, please navigate to the article "[1 How to choose a product](#)".

To get more information about our API in general, please [use our documentation portal](#) as your reference.

Using the previous method "[12 Open an access to end user](#)" we shared an access to order for end user.

After we moved through a process of [creating](#), [renewing](#), modifying and [reissuing](#) certificate time has come to check how [cancellation](#) can be processed.

Cancellation is the process of voiding your SSL order request, no matter whether it's active or not. Certificate will pass revocation at [CA](#) side and resource used certificate will no longer be protected. Please note cancellation is fully refunded if processed within 30 days after the certificate became "[ACT](#)".

↓ Use endpoint path below. Base URL is determined by both the target environment and API version.

```
POST {base_url}/ssl/orders/{id}/cancel
```

REQUEST VALUES

Name	Type	Values	Description
id	string	numeric value	Openprovider Order ID.

REQUEST EXAMPLE

```
curl -X POST \
  https://api.cte.openprovider.eu/v1beta/ssl/orders/1/cancel \
  -H 'Authorization: Bearer deb4bf804928981b018caf45c3c4142b' \
  -H 'Content-Type: application/json' \
  -d '{
    "id": "1"
  }'
```

RESPONSE EXAMPLE

```
{
  "code": 0,
  "data": {
    "id": 1
  },
  "desc": ""
}
```

RESPONSE VALUES

Name	Values	Description
code	numeric	API Result with code returned. 0 = Success with no errors.
1. data	set of values	Cancel Order Response Data.
1.1 id	integer	Returns Openprovider order ID that been processed.
desc	string	Description (if available).
maintenance	True or False	The Maintenance: True or False.
2. warnings	An array of elements.	An array of boolean and string data returned if Openprovider is under maintenance mode.
2.1 code	digits	Warning code digits.
2.2 data	string	Data value returned.
2.3 desc	string	The description value returned.

**Please note order changes status from "Active" to "Cancelled" within 24 hrs.
Code "0" indicated that we've successfully canceled an order.**

Canceled order remains in "[FAI](#)" status and cannot be reactivated.

([new order creation](#) and confirmation required even you want to protect same domain as before).
