

.ai

This article describes the procedures and requirements of .ai domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via RCP or API requires:

- two or more nameservers or a nameserver group

Transfer

A transfer is initiated with an authorization code which is provided by the current provider. The transfer is finished nearly real-time.

Authorization code required	yes
Method of confirmation	authcode
Registration period after transfer	unchanged
Average transfer time	5 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .ai domains is available.

Update

Owner change (trade)

An owner change can be performed by updating the owner handle of the domain. This change is processed realtime.

Other update

An update is processed real-time. Nameservers are instantly updated in the registry zone file.

Delete

Direct deletion is not possible for .ai domains.
You can set the domains to "autorenewal "off" and let them expire on their renewal date.

Restore / reactivate

- restore / reactivation supported via RCP or API
- quarantine period can be found under

Detailed extension information > Technical information > Quarantine period

Detailed extension information

Registry	• Registry: DataHaven.net Ltd • Registry whois: whois.nic.ai • Registry web based whois: https://whois.nic.ai/ • Registry zonefile updates: Every hour
----------	--
