

.xn--mgbam7a8h (تارام.ا)

This article describes the procedures and requirements of .xn--mgbam7a8h (تارام.ا) domain names.

Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [XML API](#) or [REST API](#) requires:

Transfer

Successful domain transfer via [RCP](#) or [XML API](#) or [REST API](#) requires:

After the transfer is initiated, the losing registrar receives a message to approve a transfer request and are given three days to dispute the request, as per regulator guidelines.

All transfers are automatically approved after 48 hours.

Please note that due to registry requirements we will implement our standard FoA (Form of Authorization) handling for incoming and outgoing transfers requests of .AE domain names.

This means that a notification e-mail will be sent to the registrant who must confirm the requested transfer. The transfer will only be processed after confirmation. Otherwise the transfer request expires.

NB: The renewal period after the transfer will not be extended, the transfer and the renewal will be separately charged.

Authorization code required	yes
Method of confirmation	authcode
Registration period after transfer	unchanged
Average transfer time	2 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .xn--mgbam7a8h domains is available.

Update

Owner change (trade)

Requested as a normal domain update via RCP or [XML API](#) or [REST API](#)

Other update

- requested via RCP or [XML API](#) or [REST API](#)
- processed realtime

Deletion / Restore

Delete

Explicit delete

- Requested via RCP or [XML API](#) or [REST API](#)
- DeleteDomain will remove the domain instantly from the panel. However, the domain will be deleted from the registry once the expiration date has been reached.
- If you need an immediate deletion, please reach out to our support team as this requires proof of the registrant.

Restore / reactivate

Restore is not supported.

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the

"Hotjar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
