

Annual Registrant Email Verification for NIS2 Compliance

As required by various country registries and in alignment with the EU NIS2 Directive, we have implemented an annual email verification process for specific country-code top-level domains (ccTLDs). This process ensures that Registrant contact data associated with domains under your management remains accurate and compliant with registry and EU requirements.

What's Happening:

We will send out annual reminder emails to Registrants of the mentioned ccTLDs, requesting them to verify the accuracy of their contact details. The email will be sent directly to the Registrant contact email address listed for each domain. This e-mail can be personalized, as described <https://support.openprovider.eu/hc/en-us/articles/360016417214-Customize-whois-data-reminder-e-mails-to-end-users-WDRP>

The following country-code TLDs (ccTLDs) and their second-level domains (SLDs) are included in the annual verification:

Country TLD(s)

Austria	.at, .co.at, .or.at
Belgium	.be
Denmark	.dk
Germany	.de
Finland	.fi
Italy	.it
Latvia	.lv
Lithuania	.lt
Hungary	.hu
Croatia	.hr
Romania	.ro
Slovakia	.sk
USA	.us
India	.in
Sweden	.se, .nu
Poland	.pl

France & Territories .fr, .re, .pm, .yt, .tf, .wf

Why is this required?

- To comply with NIS2 Directive and registry data accuracy regulations.
- To ensure domain ownership transparency.
- To prevent fraudulent or inaccurate domain registrations.
