

Can I cancel my pre-registration?

Question

How to cancel the pre-registered domains?

Answer

As long as a pre-registration is not prepared to be registered (which is shortly before the opening of the General Availability), you can delete the pre-registration from your account and you will not be charged.

In order to delete the pre-registration you need to follow the instructions:

1. Go to [New gTLDs overview](#)
2. Mark the pre-registrations you want to cancel.
3. Click on **Delete selected domains on list**
