

.CC

This article describes the procedures and requirements of .cc domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [API](#) requires:

- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

Transfer

Successful domain transfer via [RCP](#) or [API](#) requires:

- authorisation code
- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

During the transfer period which can take 5 days, the current provider or the owner can reject to the transfer.

The registration period after a successful transfer will [extend with 1 year](#), unless the transfer is ordered within the domain's auto-renew grace period at the previous registrar.

Problems transferring your domain?

Please take a look at this [extended article](#) for possible solutions.

Authorization code required	yes
Method of confirmation	authcode
Registration period after transfer	extends
Average transfer time	max 5 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .cc domains is available.

Policies	• http://archive.icann.org/en/udrp/udrp-policy-24oct99.htm
Registration agreement	<i>The registry requires that a registration agreement is in place between the provider and the domain holder. The text of this registration agreement and any required supplements is the following:</i> • General registration agreement

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge

base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
