

.cr

This article describes the procedures and requirements of .cr domain names.
Click on the subject below to open the dropdown for more information.

Registration

.cr domains are registered through a manual registration process. The manual registration process might involve documents, depending on respective registry regulations, and are therefore not automated for real-time registrations and real-time updates.

Successful domain registration via RCP or API requires:

- Tax number (individual) or VAT number (company) required.
- In case the domain owner is a private person, birth date and the ID number are also required.

Transfer

Auth code is not required.

Authorization code required	no
Method of confirmation	email
Registration period after transfer	restarts
Average transfer time	
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .cr domains is available.

Update

Owner change (trade)

- Trade and owner changes not possible.

Other update

- Requested via RCP or [API](#)
- .cr domains are registered through a manual registration process. The manual registration process might involve documents, depending on respective registry regulations, and are therefore not automated for real-time registrations and real-time updates.

Deletion / Restore

Delete

- Explicit deletion is possible.

Restore / reactivate

- Restore is only possible after domain has expired, not after the explicit deletion of the domain.
- A domain name can be restored for 15 days after the domain name has been expired.

Detailed extension information

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge

base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
