

.CW

This article describes the procedures and requirements of .cw domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [API](#) requires:

- two or more nameservers or a nameserver group
- registrant requirements:
 - local address (no local presence service available)
 - 000XX is to be used as a Postal code
 - valid phone number
 - official company listing in local Curaçao Chamber
- registration document signed by the registrant

After the registration is requested, the registry will create the registration document. This will be forwarded to the reseller. Please send the signed document back to finish the request.

com.cw : a local presence is NOT required for the registration of domain name(s) under com.cw extension.

Transfer

Successful domain transfer via [RCP](#) or [API](#) requires:

- two or more nameservers or a nameserver group
- registrant requirements:
 - local address (no local presence service available)
 - valid phone number
 - official company listing in local Curacao Chamber

We will prepare a transfer letter that must be signed by the domain holder.

The transfer process is not realtime.

Authorization code required	yes
Method of confirmation	authcode
Registration period after transfer	unchanged
Average transfer time	14
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .cw domains is available.

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
