

# .cyou

This article describes the procedures and requirements of .cyou domain names.  
Click on the subject below to open the dropdown for more information.

## Registration

Successful domain registration via [RCP](#) or [XML API](#) or [REST API](#) requires:

- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

## Transfer

Successful domain transfer via [RCP](#) or [XML API](#) or [REST API](#) requires:

- authorisation code
- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

During the transfer period which can take 6 days, the current provider or the owner can reject to the transfer.

The registration period after a successful transfer will [extend with 1 year](#), unless the transfer is ordered within the domain's auto-renew grace period at the previous registrar.

### Problems transferring your domain?

Please take a look at this [extended article](#) for possible solutions.

|                                    |                         |
|------------------------------------|-------------------------|
| Authorization code required        | yes                     |
| Method of confirmation             | authcode,email          |
| Registration period after transfer | <a href="#">extends</a> |
| Average transfer time              | Max. 6 days             |

**Advanced and simple transfers available**

Contact our [Sales department](#) to check if easy transfer of 100 or more .cyon domains is available.

## Outgoing transfer

**Authorization code reset** - - via [RCP \(Reseller Control Panel\)](#) or [XML API](#) or [REST API](#)

## Update

# Owner change (trade)

Not supported

# Other update

- requested via RCP or [XML API](#) or [REST API](#)
- processed realtime

If as part of the update the domain owner's e-mail address changes, we're obliged to start a [contact verification process](#) if this new e-mail address was not verified before.

## Deletion / Restore

# Delete

### Explicit delete

- Requested via RCP or [XML API](#) or [REST API](#)
- processed realtime
- will directly result in quarantine (redemption period) (**no** soft quarantine applies)

### Expiration

In case the domain expires (not renewed in time);

- will not be deleted directly at the registry
- will lead to [soft quarantine](#), followed by regular quarantine

## Restore / reactivate

- restore / reactivation supported via [RCP](#) or [XML API](#) or [REST API](#)
- quarantine periods can be found under  
**Detailed extension information > Technical information > Quarantine period**
- After quarantine, 5 days *PendingDelete* period (restore **not** possible)

### Detailed extension information

| <b>Registration agreement</b> | <p><i>The registry requires that a registration agreement is in place between the provider and the domain holder. The text of this registration agreement and any required supplements is the following:</i></p> <ul style="list-style-type: none"> <li>• <a href="#">General registration agreement</a></li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
