

.es Trade

Question

How to make a trade (change of owner) for a .es?

Answer

To change the owner of a .es domain, it is necessary that the domain owner or the administrative contact request such a change in ESNIC. Below we explain the steps to follow to start a change of ownership.

1. Before you start first you must make sure that the contact that will be the new owner of the domain has an identifier created in ESNIC. To do this you must contact us. You must send us the Openprovider contact (something like RF543535-ES) of the new owner and we will confirm if it is already created or, where appropriate, we will create it and send it to you in order to be used.
2. Once you have the new handle, log in [here](#) with the administrative or owner handle and password. If you do not have the password you must request it on this website and ESNIC will send it to you by e-mail. If you do not know the handle of the owner or administrative contact you can look for it in the [whois](#).

IMPORTANT: if you create the admin handle in Openprovider, do not fill in the "company" field; let it blank.

3. Once in, click on **Domain Transfer Request**. In this section enter the handle of the new owner and the administrative contact (PCA).

If you have logged in with the administrative contact, you must add a copy of the ID card (DNI in Spain), since this must be a person with name and surname.

If you have logged in with the contact of the owner, you must add a copy of the ID card (DNI in Spain) if the holder is a natural person or a copy of the CIF / NIF if the holder is a company.

Domain name :	es-test-op.es						
Request Type :	Domain transmission						
Request state :	Transmission request received						

5. And you will receive this email to the address of the administrative contact, which you must confirm:

Estimado Sr./Sra.,

En fecha 06/05/2020, se ha recibido solicitud de transmisión del nombre de dominio "es-test-op.es" a su favor.

Puede proceder a [confirmar](#) o [rechazar](#) la misma (click en la acción correspondiente).

Para tal fin dispone de un plazo hasta el próximo 16 de mayo de 2020. Transcurrido el mismo, sin haberse recibido respuesta, dicha solicitud será anulada.

Atentamente,

DOMINIOS.ES
Entidad pública empresarial Red.es

Dear Sir / Madam,

On 06/05/2020 has begun the transmission procedure of the domain name "es-test-op.es" on your behalf.

For the purposes of completing the transmission process or cancelling it finally, you must [accept](#) or [cancel](#) the "Domain Transmission" request (click on the relevant action).

To this end you have until May 16 of 2020, and if we have not received a response from the interested party by this deadline, the request will be cancelled.

Yours faithfully,

DOMINIOS.ES
Public Corporate Entity Red.es

6. Confirm the change of owner.

Accept domain transmission

Do you want to accept the transmission process for the domain

☒ Yes ☐ No

Continue 

7. In this step, you must click on "Registrar agent" and click on REGISTRAR.EU. This is very important because if you do not mark it, the domain will be transferred to the registry and will no longer be in Openprovider.

Request state :	Transmission request pending Registrar						

9. At this time, the process depends on the registrar agent, that is, on Openprovider. Please send us an email to support@openprovider.com with the domain name so we can confirm the change. **If the ownership change is not approved within 10 days, the domain will be automatically transferred to the registry.**

10. Once the change is confirmed, it will be in the hands of the registry. When the registry accepts it, the change will take place.

Please, be aware that the registrant or admin should manage this trade process.

In case this is really no option, the support department of Openprovider can assist for additional fee of 60 euros.
