

.gg

This article describes the procedures and requirements of .gg domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [XML API](#) or [REST API](#) requires:

- registrant [e-mail address verification](#) applies

Note that, as for ICANN's contact verification requirements, we are obliged to send an e-mail to the domain owner if his e-mail address was not verified before. Failure to respond to this e-mail may lead to suspension of any gTLD domain name with this same e-mail address in the owner contact.

A new registration is processed in realtime.

Transfer

Successful domain transfer via [RCP](#) or [XML API](#) or [REST API](#) requires:

- authorisation code
- registrant [e-mail address verification](#) applies

To be able to complete .GG domain transfers you'll need your current registrar to give you the domain's AuthCode or EPP-Key, with it you'll be able to verify your domain's ownership.

Transfers can take between 5 and 7 days to complete.

Authorization code required	yes
Method of confirmation	authcode,email
Registration period after transfer	extends
Average transfer time	Max 7 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .gg domains is available.

Update

Owner change (trade)

- requested as a normal domain update via RCP or [XML API](#) or [REST API](#)
- processed realtime

A change of ownership can be done by replacing the owner contact in the control panel. After saving the changes the change is processed realtime. Both the previous and the new registrant will receive an e-mail.

Other update

- requested via RCP or [XML API](#) or [REST API](#)
- processed realtime

A change of contact details or nameservers can be done by updating the associated handles or nameservers in the control panel. After saving the changes, the domain name will be updated in realtime. Updating nameservers is not real-time, but can take up to 24hrs. If the time has passed but nameservers are not updated, please contact support@openprovider.com.

Deletion / Restore

Delete

- Requested via RCP or [XML API](#) or [REST API](#)

Once the domain is deleted, it goes directly to Hard Quarantine, hence if you need to keep the domain ACTIVE, ensure that the Auto Renew is ON.

Restore / reactivate

Restore - not supported for this TLD

Detailed extension information

Registry	• Registry: Island Networks Ltd • Registry whois: whois.gg • Registry web based whois: https://www.channelisles.net/ • Registry zonefile updates: Unknown
Technical information	• DNSSEC support: no • Minimum length - 3 • Maximum length - 63 • Registration period: 1 year • Renewal date offset: 35 days <i>The number of days before the registry's expiration date, that Openprovider requires the domain to be renewed or expired. More info.</i> • Soft quarantine period: n/a days <i>During this period, following after an expiration, the domain can be restored for free. This period does not apply if the domain is deleted explicitly. More info.</i> • Quarantine period: 0 days <i>During this period, an expired or deleted domain name can be reactivated at an additional fee.</i>
Restrictions	• Local presence required? no • Does Openprovider provide local presence services? no • Local activity required? no • Correct nameserver configuration required? no
Policies	• Rules for Uniform Domain Name Dispute Resolution Policy
Registration agreement	<i>The registry requires that a registration agreement is in place between the provider and the domain holder. The text of this registration agreement and any required supplements is the following:</i> • General registration agreement

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "Hotjar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
