

gTLD domain has serverTransferProhibited EPP status

Symptoms

Domain has '**serverTransferProhibited**' EPP status.

Cause

- Domain has been transferred or registered less than 60 days ago.

OR

- Domain is in a legal dispute.

Resolution

- In case of 60 days lock - EPP status will be removed by the registry automatically.
- In case of a legal dispute - depends on the outcome of the case.
