

How to export a list with domains from the control panel?

Question

How to export a list with domains from the control panel?

Answer

At the bottom of the [domains overview](#) page, you can find Export option. There are 2 options to generate a CSV. You can create a CSV export for the complete list of domains or in case you have selected certain filters, for a filtered list.

In case of a large domain portfolio, this may take several minutes. In case you do not receive the email within a few minutes, please also check your spam-folder. You can either Download the CSV export or send it to an email address.

aaaaatest123.be	Active	2024-10-24	2025-10-23	Company super name		Off (Default)		
aaaaatestre.com	Active	2024-05-07	2025-05-07	testCompnay		Off (Default)

Export

☒

Export filtered overview

☐

Export complete overview

E-mail *

me@mydomain.com

Download .csv

Send .csv

Be aware that this export will contain **all** domain data, like handles, nameservers, but also transfer codes.

Note: If you would like to do an export of a larger number of domains or encounter any issues with export, [please contact our support team](#).
