

.madrid

This article describes the procedures and requirements of .madrid domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [API](#) requires:

- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies
- an "intended use" that describes how the domain name will be used

Until the 17th of December 2021, the registry pre-evaluates all .madrid registration requests. During this pre-evaluation, which normally takes a maximum of working 5 days, the domain remains in "Requested" status, or "pendingCreate" in the whois. During this period, no-one else can apply for the same name if the domain is in this status. The expiration date will be based on the date of the effective approval.

Transfer

Successful domain transfer via [RCP](#) or [API](#) requires:

- authorisation code
- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

During the transfer period which can take 6 days, the current provider or the owner can reject to the transfer.

The registration period after a successful transfer will [extend with 1 year](#), unless the transfer is ordered within the domain's auto-renew grace period at the previous registrar.

Problems transferring your domain?

Please take a look at this [extended article](#) for possible solutions.

Authorization code required	yes
Method of confirmation	authcode,email
Registration period after transfer	extends
Average transfer time	Max. 6 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .madrid domains is available.

Update

Owner change (trade)

- requested as a normal domain update via RCP or [API](#)
- processed realtime
- both previous and new registrant will receive an e-mail. This is a notification only, no action is required.
- registrant [e-mail address verification](#) applies

Other update

- requested via RCP or [API](#)
- processed realtime

If as part of the update the domain owner's e-mail address changes, we're obliged to start a [contact verification process](#) if this new e-mail address was not verified before.

Deletion / Restore

Delete

Explicit delete

- Requested via RCP or [API](#)
- processed realtime

- will directly result in quarantine (redemption period) (**no** soft quarantine applies)

Expiration

In case the domain expires (not renewed in time);

- will not be deleted directly at the registry
- will lead to [soft quarantine](#), followed by regular quarantine

Restore / reactivate

- restore / reactivation supported via [RCP](#) or [API](#)
- quarantine periods can be found under

Detailed extension information > Technical information > Quarantine period

- After quarantine, 5 days *PendingDelete* period (restore **not** possible)

Detailed extension information

Registry	• Registry: Comunidad de Madrid • Registry whois: whois.nic.madrid • Registry web based whois: https://whois.nic.madrid/ • Registry zonefile updates: Realtime
Domain lifecycle	[External embedded content: https://www.openprovider.com/domain-lifecycle/domains.php?ext=madrid]
