

.meme

This article describes the procedures and requirements of .meme domain names.
Click on the subject below to open the dropdown for more information.

Registration

General Availability started for .meme on : December 5th, 2023.

Successful domain registration via [RCP](#) or [API](#) requires:

- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

SSL certificate required

Note that the registry has put the extension on the [HSTS preload list](#). As a result, web browsers will not show the website unless it is secured with an SSL certificate. Check the Openprovider control panel for more information on how to order an SSL certificate. You can still register a domain without installing SSL certificate. The domain will be yours, but the domain will not load in the browser. Other applications will work as normal (e.g. e-mail).

Transfer

Successful domain transfer via [RCP](#) or [API](#) requires:

- authorization code
- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

During the transfer period which can take 6 days, the current provider or the owner can reject to the transfer.

The registration period after a successful transfer will [extend with 1 year](#), unless the transfer is ordered within the domain's auto-renew grace period at the previous registrar.

Problems transferring your domain?

Please take a look at this [extended article](#) for possible solutions.

Authorization code required	yes
Method of confirmation	authcode,email
Registration period after transfer	extends
Average transfer time	Max. 6 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .meme domains is available.

Update

Owner change (trade)

Owner/registrant change is not supported for the extension.

Other update

- requested via RCP or [API](#)
- processed real-time

If as part of the update the domain owner's e-mail address changes, we're obliged to start a [contact verification process](#) if this new e-mail address was not verified before.

Deletion / Restore

Delete

Explicit delete

- Requested via RCP or [API](#)
- processed realtime
- will directly result in quarantine (redemption period) (**no** soft quarantine applies)

Expiration

In case the domain expires (not renewed in time);

- will not be deleted directly at the registry
- will lead to [soft quarantine](#), followed by regular quarantine

Restore / reactivate

- restore / reactivation supported via [RCP](#) or [API](#)
- quarantine periods can be found under
Detailed extension information > Technical information > Quarantine period
- After quarantine, 5 days *PendingDelete* period (restore **not** possible)

Detailed extension information

Registry	• Registry: Charleston Road Registry Inc. • Registry whois: whois.nic.google • Registry web based whois: https://www.registry.google/whois-lookup/ • Registry zonefile updates: Realtime
Domain lifecycle	[External embedded content: https://www.openprovider.com/domain-lifecycle/domains.php?ext=meme]
