

.moscow

This article describes the procedures and requirements of .moscow domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or API requires:

- an owner contact with birth date (in case of a private individual) and passport number.
- a valid VAT number for companies (company name field filled in).
- two or more nameservers or a nameserver group.
- registrant [e-mail address verification](#) applies.

Transfer

Successful domain transfer via [RCP](#) or API requires:

- authorization code
- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

During the transfer period which can take 6 days, the current provider or the owner can reject to the transfer.

The registration period after a successful transfer will [extend with 1 year](#), unless the transfer is ordered within the domain's auto-renew grace period at the previous registrar.

Problems transferring your domain?

Please take a look at this [extended article](#) for possible solutions.

Authorization code required	yes
Method of confirmation	authcode,email
Registration period after transfer	extends

Average transfer time	Max. 6 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .moscow domains is available.

Update

Owner change (trade)

- requested as a normal domain update via RCP or API
- processed real-time
- both previous and new registrant will receive an e-mail. This is a notification only, no action is required.
- registrant [e-mail address verification](#) applies

Other update

- requested via RCP or API
- processed real-time

If as part of the update the domain owner's e-mail address changes, we're obliged to start a [contact verification process](#) if this new e-mail address was not verified before.

Deletion / Restore

Delete

Explicit delete

- Requested via RCP or API
- processed real-time
- will directly result in quarantine (redemption period) (**no** soft quarantine applies)

Expiration

In case the domain expires (not renewed in time);

- will not be deleted directly at the registry
- will lead to [soft quarantine](#), followed by regular quarantine

Restore / reactivate

- restore / reactivation supported via [RCP](#) or API
- quarantine periods can be found under
Detailed extension information > Technical information > Quarantine period
- After quarantine, 5 days *PendingDelete* period (restore **not** possible)

Detailed extension information

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
