

.mp

This article describes the procedures and requirements of .mp domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [XML API](#) or [REST API](#) requires:

- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies
- Registration is not realtime and can take upto 3 business days

Transfer

A written confirmation from the domain owner is required to start the transfer.

This can be sent to support@openprovider.com

The registry will check the information and then initiate the transfer.

Authorization code required	no
Method of confirmation	forms
Registration period after transfer	extends
Average transfer time	unknown
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .mp domains is available.

Update

- requested via RCP or [XML API](#) or [REST API](#)
- not real time, can take up to 2 days.

If as part of the update the domain owner’s e-mail address changes, we’re obliged to start a [contact verification process](#) if this new e-mail address was not verified before.

Deletion / Restore

Delete

Manual process, can be requested by sending an email tosupport@openprovider.com

Restore / reactivate

Manual process, can be requested by sending an email tosupport@openprovider.com

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "Hotjar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
