

.net.tr

This article describes the procedures and requirements of .net.tr domain names.

Click on the subject below to open the dropdown for more information.

Registration

Registration process:

- Domain registration is requested via RCP or API.
- Two or more nameservers must be configured and return an authoritative answer before the domain is requested.

Transfer

- Transfer is preformed by the current domain registrar by updating domain owner NIC handles to the handles of the new registrar. Contact Openprovider support to receive NIC handles set
- Transfer application form, signed and stamped

Authorization code required	no
Method of confirmation	email,forms
Registration period after transfer	restarts
Average transfer time	10 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .net.tr domains is available.

Outgoing transfer

Once the transfer is initiated at the new registrar, the transfer needs to be approved manually by us.

Please contact our [Support Department](#) requesting the same.

Update

Owner change (trade)

- **Trade** - not supported for this TLD

Other update

- **Handle updates** - not supported
- **DNS zone updates** - via RCP and API. Not real-time. Update can take 6-12 hours to complete
- **Nameserver updates** - via RCP and API. Not real-time. Process is manual, can take up to 2 business days to complete

NB: Error message like `Domain update failed: E0102, Domain could not be updated., Identical task is already being processed` means previous update is not finished yet

Deletion / Restore

Delete

- **Delete** - via RCP or API.

Once the domain is deleted, it goes directly to Hard Quarantine, hence if you need to keep the domain ACTIVE, make sure that the Auto Renew is ON.

Restore / reactivate

- **Restore** - not supported for this TLD

Once the domain is expired, it will be available after **3 MONTHS** for re-registration.

Detailed extension information

Registry

- Registry: [NIC.tr](https://www.nic.tr)
- Registry whois: whois.nic.tr
- Registry web based whois: <https://www.nic.tr>
- Registry zonefile updates:

Domain lifecycle	[External embedded content: https://www.openprovider.com/domain-lifecycle/domains.php?ext=net.tr]
Technical information	• DNSSEC support: no • Minimum length: 3 characters • Maximum length: 63 characters • Allowed characters: a-z 0-9 - • IDN characters: letters of the Turkish alphabet: ı, ö, ü, ç, ş, ğ • Registration period: 1-5 years • Renewal date offset: 35 days <i>The number of days before the registry's expiration date, that Openprovider requires the domain to be renewed or expired. More info.</i> • Soft quarantine period: n/a days <i>During this period, following after an expiration, the domain can be restored for free. This period does not apply if the domain is deleted explicitly. More info.</i> • Quarantine period: 0 days <i>During this period, an expired or deleted domain name can be reactivated at an additional fee.</i>

Registration agreement	<i>The registry requires that a registration agreement is in place between the provider and the domain holder. The text of this registration agreement and any required supplements is the following:</i> • General registration agreement

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
