

.rs

This article describes the procedures and requirements of .rs domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [API](#) requires:

- All used handles must include a VAT number (You can add the VAT Number or the personal ID)
- Local presence required - local presence service available
- two or more nameservers or a nameserver group

Transfer

Successful domain transfer requires:

- an authorisation code
- two or more nameservers or a nameserver group
- Documents needs to be send to support department:
 - **For private individual**
 - Copy Passport
 - **For companies**
 - Company registration document

After initiating the transfer please send the Company Registration certificate for companies and/or Passport for Individuals to our support team. Be aware: an ownerchange is not possible during the transfer. It has to be requested after the transfer is finished.

Additional notes on a .rs transfer

-

Authorization code required	yes
Method of confirmation	authcode
Registration period after transfer	extends
Average transfer time	5 days
Advanced and simple transfers available	Contact our Sales department to check if easy transfer of 100 or more .rs domains is available.

Outgoing transfer

The transfercode can only be sent to the registrant. This is a manual process. Please contact our support team at support@openprovider.com if you want us to request this at the registry.

Update

Owner change (trade)

A change of ownership can be done by replacing the registrant handle. After initiating the trade please send the Business Registration certificate for companies and/or Passport for Individuals (Copy) to our support team.

Other update

A change in the information of the domainname can be done by updating it in the control panel. These changes are processed real-time. A change in nameservers will also work immediately.

Deletion / Restore

Delete

The deletion of the domain is realtime.

Restore / reactivate

Restore of .rs is not possible.

Detailed extension information

Registry	• Registry: RNIDS • Registry whois: whois.rnids.rs • Registry web based whois: https://www.rnids.rs/en/whois/ • Registry zonefile updates: Realtime

Policies	
Registration agreement	<i>The registry requires that a registration agreement is in place between the provider and the domain holder. The text of this registration agreement and any required supplements is the following:</i> • General registration agreement

Due to the regular changes in registry rules and configuration or missing information from registry side, and despite our effort to keep our knowledge base up-to-date, information in the knowledge base may be outdated or incorrect. If you encounter some issue, please report it through the "HotJar" feedback collector on the bottom right, or (if it is blocked by your browser) by clicking the "Submit a request" link below. No rights can be derived from the information in this knowledge base. If there is discrepancy between the knowledge base and the process in Openprovider, the process in Openprovider is leading.
