

.vuelos

This article describes the procedures and requirements of .vuelos domain names.
Click on the subject below to open the dropdown for more information.

Registration

Successful domain registration via [RCP](#) or [API](#) requires:

- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

For registration of a .vuelos domain, a special registration token is required. The registry provides this code (called the *allocation token*) to the domain applicant after it has confirmed its eligibility. Contact us for more information about the token provisioning process. After a token has been assigned, a new domain registration is processed in realtime.

Transfer

Successful domain transfer via [RCP](#) or [API](#) requires:

- authorisation code
- two or more nameservers or a nameserver group
- registrant [e-mail address verification](#) applies

During the transfer period which can take 6 days, the current provider or the owner can reject to the transfer.

The registration period after a successful transfer will [extend with 1 year](#), unless the transfer is ordered within the domain's auto-renew grace period at the previous registrar.

Problems transferring your domain?

Please take a look at this [extended article](#) for possible solutions.

Update

Owner change (trade)

- requested as a normal domain update via RCP or [API](#)
- processed realtime
- both previous and new registrant will receive an e-mail. This is a notification only, no action is required.
- registrant [e-mail address verification](#) applies

Other update

- requested via RCP or [API](#)
- processed realtime

If as part of the update the domain owner's e-mail address changes, we're obliged to start a [contact verification process](#) if this new e-mail address was not verified before.

Deletion / Restore

Delete

Explicit delete

- Requested via RCP or [API](#)
