

Why do I only see the registrant contact for a domain and not the other contacts (admin, tech, billing)?

As of **August 21, 2025**, ICANN's new **Registration Data Policy** came into effect. This policy defines the minimum data set that registrars and registries are required to collect and process for domain registrations.

☐ As a result, only the **registrant contact** can be stored and displayed. Additional contacts (administrative, technical, billing) are no longer part of the required data set and therefore are no longer available in the RCP.
