Company updates

Try our updated WHMCS module

Some studies suggest that business owners spend roughly 50% of their time on manual, routine processes. WHMCS is a tool, tailored specifically for web hosting businesses, that takes these tasks out of your hands, freeing up your valuable time for business growth and customer engagement.

Our Openprovider WHMCS module recently underwent a big update and is now fully compatible with PHP 8.1, making it even more user-friendly for resellers and end users alike. Get it in the [WHMCS marketplace](#) and let us know your thoughts! With your feedback, we can keep improving our module to best serve your and your customers' needs.

We recently conducted a webinar on "WHMCS Update: Key Enhancements and Roadmap." You can view the [presentation and Q&A session](#), and access our [toolkit](#) to get the most out of your use of WHMCS.

Customer excellence

Serving 185,000 customers
by keeping it simple

6 years with **open**provider

The latest installment of our Customer Recognition Program features JouwWeb and the story of a 13-year-old's hobby to a leading web hosting service. This inspirational tale, which includes lessons for aspiring entrepreneurs everywhere, details how JouwWeb reached 185,000 customers by keeping it simple. [Read the story](#)
