

Newsletter June 2025

You may have read in the trade press about a recent software vulnerability reported to us by a security researcher. While no data was compromised, this incident highlighted the importance of clearer, faster communication with our customers. We recognize that in situations like these, clear updates matter, and we are taking active steps to strengthen how we keep you informed moving forward.

We've taken immediate steps to strengthen our processes, both to protect your data and to ensure you hear from us promptly and directly should any issue arise in the future.

Security has always been a core priority at Openprovider, and this month's updates reflect our ongoing investment in keeping you (and your customers) protected. From our upgraded ISO 27001:2022 certification to tools you can use to reduce client risk, there's plenty to explore.

And that's just one part of this month's newsletter. Keep reading for promotions, productivity tools, and practical tips to help you grow your business, even as summer kicks off.

Special offers: save before the month ends

A promotional banner for Openprovider's Summer sale. The background is a bright blue sky over a body of water. A man in dark swim trunks is jumping joyfully with his arms raised. In the top right corner is the Openprovider logo. On the left, a blue banner says "Summer sale!". In the center, a large red scalloped-edged badge contains the text "90% OFF Openprovider Membership*". At the bottom left, small text reads: "*Applies to first-year Basic S Membership only. Auto-renews after 12 months at full-price \$49.99".

Did you know? [Openprovider Members](#) get **all domain transactions** - including **renewals** and **transfers** - at wholesale prices?

If we pay €4.25 for .nl domains with the registry, so do you. That's a **64% discount** compared to the average retail price.

Hurry! The sooner you join with 90% off, the more you save on domains. [Buy Membership now](#)

*Current promotion pricing valid until midnight CET Monday - June 30th, 2025. Applies to new Members for their first year only, valid on Basic S Membership. Auto renewal after 12 months at full-price \$49.99

Platform and product updates

Openprovider's Google Cloud migration success story

In 2023, we completed a major transformation by migrating our entire infrastructure to Google Cloud. As part of this journey, our CEO, Arno Vis, and CTO, Shreerang Gondegaonkar, sat down with Google to share how the migration has strengthened our market position, improved operational efficiency, and opened up new opportunities for sustainable growth in an ever-evolving digital landscape.

Customer success

Building business through genuine connection

5 years with **openprovider**

Lenmedia, our latest customer success story, explains how they **share real-time data with customers** to flag issues before they even notice that something needs addressing. This feature is also of interest for any business thinking of **transitioning from web hosting to a managed service provider (MSP)**. Lastly, we explain how **Openprovider Membership** helps them become more successful with domains with one simple subscription. [Read it here.](#)

Security spotlight: protecting you and your customers

Openprovider achieves ISO/IEC 27001 certification upgrade

Security has no finish line - but it does have milestones. Openprovider has officially upgraded its ISO/IEC 27001 certification to the latest 2022 standard, reinforcing our commitment to top-tier information security. This new certification means stronger data protection, smarter risk management, and even more confidence for our customers and partners.
