

Cloudlinux plans

CloudLinuxOS Solo

Intended for individual use on VPS/Dedicated servers, this is a compact yet powerful plan that offers the core features of the CloudLinux operating system.

Key Features:

- Allows one hosting account
- CageFS for security and isolation
- PHP Selector with HardenedPHP for PHP version management
- Apache mod_lsapi PRO for improved PHP performance
- Website Monitoring Tool and Slow Site Analyzer to maintain site health
- PHP X-Ray for in-depth performance insights
- AccelerateWP for enhanced WordPress performance
- Round-the-clock support

CloudLinuxOS Admin

Crafted for shared hosting on VPS/Dedicated servers, this plan accommodates more hosting accounts and brings additional development-oriented features to the table.

Key Features:

- Supports up to 5 hosting accounts
- Offers all the features in CloudLinuxOS Solo
- Resource limits (LVE) for optimized resource allocation
- Ruby, Python, and NodeJS Selector for flexible programming environment
- SecureLinks for symlink protection

CloudLinuxOS Shared

This plan is our standard solution for shared hosting environments, offering an optimal balance between functionality and cost.

Key Features:

- Unlimited hosting accounts
- Inherits all the features of CloudLinuxOS Admin
- MySQL Governor for real-time MySQL monitoring and management

CloudLinuxOS Shared Pro

Our premium offering, CloudLinuxOS Shared Pro is engineered for high-end shared hosting environments, prioritizing performance and advanced features.

Key Features:

- Unlimited hosting accounts
- All the benefits of CloudLinuxOS Shared
- PHP X-Ray for diagnosing slow PHP scripts
- Centralized Monitoring for an aggregated view of your server's performance
- AccelerateWP for enhanced WordPress performance

All of our plans ensure the security, stability, and performance of your sites with features like CageFS, HardenedPHP, Apache mod_lsapi PRO, and 24/7 support. Each plan is designed with a specific user base in mind, and we recommend choosing a plan that aligns with your requirements, future growth projections, and overall operational strategy.

Comparison table

Features	CloudLinuxOS Solo	CloudLinuxOS Admin	CloudLinuxOS Shared	CloudLinuxOS Shared Pro
Maximum amount of hosting accounts	1	5	unlimited	unlimited
Resources limits (LVE)
