

Upgrading and Downgrading Plesk Licenses

Question

How do I upgrade or downgrade a Plesk License?

Answer

Plesk Licenses can be upgraded from our [RCP](#).

If you have a VPS Plesk Edition it can be upgraded to the respective VPS Plesk Edition.

If you have a Dedicated Plesk Edition it can be upgraded to the respective Dedicated Plesk Edition.

Not only the license itself, but the extension can also be modified on that page

Note: Upgradation between VPS, Dedicated editions and Cloud Linux editions (and vice versa) is **not possible**.

How to Upgrade a Plesk License ?

1. Login into [RCP](#).
2. Go to **Plesk** Section.
3. Enter the License Key which you wish to upgrade.
4. Click the **Modify** option.

License details

Product	Plesk
Group	Plesk 12/Onyx/Obsidian keys
Key type	Plesk for VPS Web Host Edition
License number	
Activation code	

[Back to order overview](#)

Delete

Modify

5. Select the category and time period to which you want to upgrade your license.

Modify license PLSK.10487139

Plesk 12/Onyx/Obsidian keys

Plesk for VPS Web Host Edition

Type	Plesk for VPS Web Host Edition	₹ 2,821.66
Period	Plesk for VPS Web Admin Edition Plesk for VPS Web Host Edition Plesk for VPS Web Pro Edition 1 month Choose a longer period for additional discounts.	
Bind IP Address	ⓘ IMPORTANT: Binding IP address to a Plesk license is mandatory. Using the same license on multiple server instances is against Plesk EULA and if reported will lead to license termination without a right to refund. Please refer to Openprovider's Knowledge Base article for more details. For more information please contact our support.	

6. Finalise your order and make payment.
