

How can a reseller change the password of the account?

Question

How to change the password in the control panel?

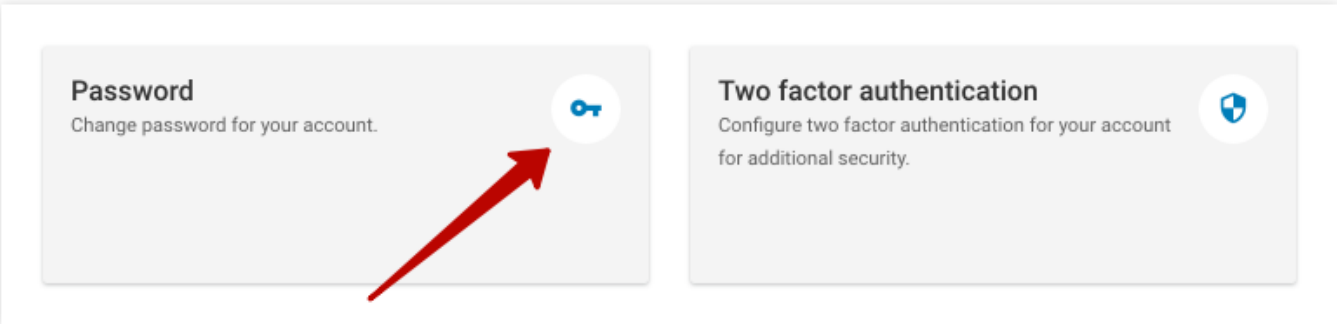

Answer

To change the password log in to the reseller account dashboard, then navigate to the **Account** tab at the bottom left corner of the page and click on the **Security** link.

Once the page is loaded there are two tabs, one is Password and other is Two Factor Authentication.

Security

Click on the Password tab and set your desired password.

Change password

Old password

Required

New password

Required

Repeat new password

Required

Back to settings

Change password

Once the new password is filled in click on 'Change Password' on the bottom-right to save the modification.
