

How to change company details in the resellers account?

Question

How can the reseller change the company details in his account?

Answer

The reseller can configure the account by navigating to [Account](#) in the control panel on the left side.

Once there the reseller can see the company details in of the account by clicking [View](#) and if modification is needed click on [Edit company data](#).

The company details from this overview will be used on the monthly invoice. It is not possible to change these details on the invoice once generated.

The support or sales team will not change the account details via email or phone requests due to security reasons.
